

Hardik Mohanbhai Khandhar

Senior Full Stack Developer

Email: hardik@example.com | Phone: +91 98765 43210 | Location: Gujarat, India

PROFESSIONAL SUMMARY

UI/UX Designer and Senior Full Stack Developer with 8.4 years of professional experience specializing in engineering scalable backend architectures, high-performance REST APIs, real-time communications, and intelligent AI solutions. Experienced in managing cloud infrastructure on AWS, designing relational and non-relational database schemas, and delivering robust systems for international clients.

TECHNICAL SKILLS

Backend: Node.js, Laravel, CodeIgniter, PHP, Python

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3

Databases: MySQL, MongoDB, PostgreSQL, SQLite

Cloud & Realtime: AWS (EC2/S3/Lambda), Firebase, Socket.IO, Pixel Streaming

Third-party APIs: Google Maps, Twilio, Agora WebRTC, HyperPay, MessageBird, BlueDart, DHL

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer & Tech Lead | International Clients (2022 - Present)

- Developed highly scalable REST APIs powering global mobile applications, supporting millions of transactions.
- Built AI-powered web applications integrating custom neural models and LLM endpoints to automate decision-making.
- Worked directly with international clients to gather requirements, design cloud systems, and coordinate deliverables.
- Managed containerized AWS infrastructure (EC2, S3, RDS, Lambda, VPC) with zero-downtime CI/CD pipelines.

Full Stack Developer | Enterprise Web Applications (2018 - 2022)

- Created reactive Admin Dashboards with detailed charts, complex filters, and dynamic role permissions.
- Integrated Firebase Push Notification payloads for high-throughput mobile device updates.
- Developed secure payment gateway modules utilizing HyperPay, Stripe, and custom 2FA verification tokens.
- Built low-latency real-time applications including direct chat and dashboard notifications using Socket.IO.

Junior Backend Developer | Dynamic Web Platforms (2017 - 2018)

- Developed mobile APIs using PHP Laravel and CodeIgniter structures to deliver fast JSON payloads.
- Optimized complex MySQL database queries, reducing API response latency by 35%.
- Integrated third-party courier services (BlueDart, DHL) for automated logistical status updates.

SELECTED PROJECTS

CogSleep: AI-powered health platform focused on diagnosing sleep patterns and offering cognitive wellness suggestions.

Multi Merchant App: Unified e-commerce infrastructure supporting multiple merchants with HyperPay and DHL logistics.

Whizzy: Real-time local logistics and delivery dispatcher platform utilizing Socket.IO and Google Maps direction APIs.

Art of Living: Community reservation portal scaling to 250,000+ users with secure 2FA Twilio integration.

Plattir: Interactive 3D real estate visualization portal using Unreal Engine Pixel Streaming over custom WebRTC.

EDUCATION Background

Master of Computer Applications (MCA) | Postgraduate Degree in Computer Science

Bachelor of Computer Applications (BCA) | Undergraduate Degree covering Programming, DB & Web Architectures
