Location: Ahmedabad, Gujarat, India | LinkedIn: [linkedin.com/in/hardik-khandhar-410215124](https://www.linkedin.com/in/hardik-khandhar-410215124)

PROFESSIONAL SUMMARY

I am a passionate Full Stack Engineer specializing in designing robust REST architectures, relational/non-relational database schemas, and integrating custom artificial intelligence modules. I work closely with international clients to deliver performant systems that scale efficiently in the cloud.

TECHNICAL SKILLS

Backend Development:	Node.js, Laravel, RESTful APIs Architecture, CodeIgniter / PHP, Python & Django
Frontend Engineering:	React.js, Vanilla JavaScript (ES6+), Socket.IO & WebSockets, HTML5, CSS3 & Styling Systems
Database & Cloud:	MySQL & PostgreSQL, MongoDB, AWS Services (EC2/S3/Lambda), Firebase Systems (Auth/DB/Push), SQLite & Local Cache
Tooling & Integrations:	Google Maps API, Twilio SMS/Voice, Agora WebRTC Video, HyperPay Payment Gateway, 2FA Security Standards, MessageBird, BlueDart Logistics, DHL Express API, Git & GitHub, Linux Administration, Nginx / Apache HTTP Server, Pixel Streaming Server Setup
Languages:	English, Hindi, Gujarati (Mother tongue)

PROFESSIONAL EXPERIENCE

Software Developer Hyperlink InfoSystem Pvt. Ltd.	<i>Nov 2020 - Present</i>
- Served as a Project Mentor & Scrum Master, mentoring a team of 15+ juniors. - Managed end-to-end requirement analysis and technical execution blueprints. - Directed and maintained high-performance development of Node.js, React.js, and Laravel projects for dynamic database-driven applications.	
Software Engineer eBizTrait Technolabs Pvt. Ltd	<i>Sep 2019 - Nov 2020</i>
- Executed end-to-end software requirements and analyzed product specifications. - Led direct client communications to understand and iterate project features. - Built, managed, and maintained robust Laravel projects for dynamic database-driven web systems.	
PHP / Python Developer Peerbits Solutions Pvt Ltd	<i>May 2017 - Sep 2019</i>
- Developed, tested, and maintained complex Laravel and Yii2 projects for dynamic enterprise websites. - Designed, coded, debugged, and tested custom system specifications for conversion and migration projects. - Audited programming assignments and reported developmental statuses to project managers.	

SELECTED PROJECTS

CogSleep (CogLiving) — An advanced health application focused on improving daily routines and using the latest in sleep science to improve sleep for the long term. (Node.js, PHP CodeIgniter, Firebase, REST APIs, Database Design)

Multi Merchant App — A high-availability e-commerce platform where multiple merchants can list their products, customers browse and purchase groceries, and delivery agents handle last-mile logistics. (Node.js, PHP CodeIgniter, REST APIs, MySQL)

Whizzy — An innovative web platform in which users can connect with an AI agent developed in Unreal Engine, utilizing Pixel Streaming to show Unreal within the browser. (React.js, Unreal Engine, Pixel Streaming, WebRTC, Autoscaling)

Art of Living — A meditation application providing courses and content regarding sleep, stress, focus, and anger management, along with booking for in-person workshops. (Laravel, React.js, REST APIs, MySQL)

Plattir — A social dining and restaurant portal connecting food establishments and customers with menu browsing, orders, and real-time messaging between dine-in customers. (Laravel, Client Relations, Team Leadership, WebSockets)

NWAS — A web platform in which users can schedule online courses, register for educational sessions, and book online meetings. (PHP CodeIgniter, Client Communication, Team Coordination)

EDUCATION BACKGROUND

Master of Computer Applications (MCA) Advanced Postgraduate Degree in Computer Science and Software Engineering	<i>Completed</i>
Bachelor of Computer Applications (BCA) Foundational Degree covering Programming Paradigms, DB Design, and Web Architectures	<i>Completed</i>
